

Application No.: 10/086,392

DRAWINGS:

The attached sheet of drawings includes a change to FIG. 5. Specifically, reference designator 515 has been added to the control pin emanating from element 514. Reference designator 515 was included with the informal drawings originally filed, and then was inadvertently omitted from the formal drawings. As this amendment is being transmitted via fax, formal drawings will be concurrently transmitted by mail. The attached drawing serves as Applicants' proposed correction to the objection under 37 CFR 1.83(a).

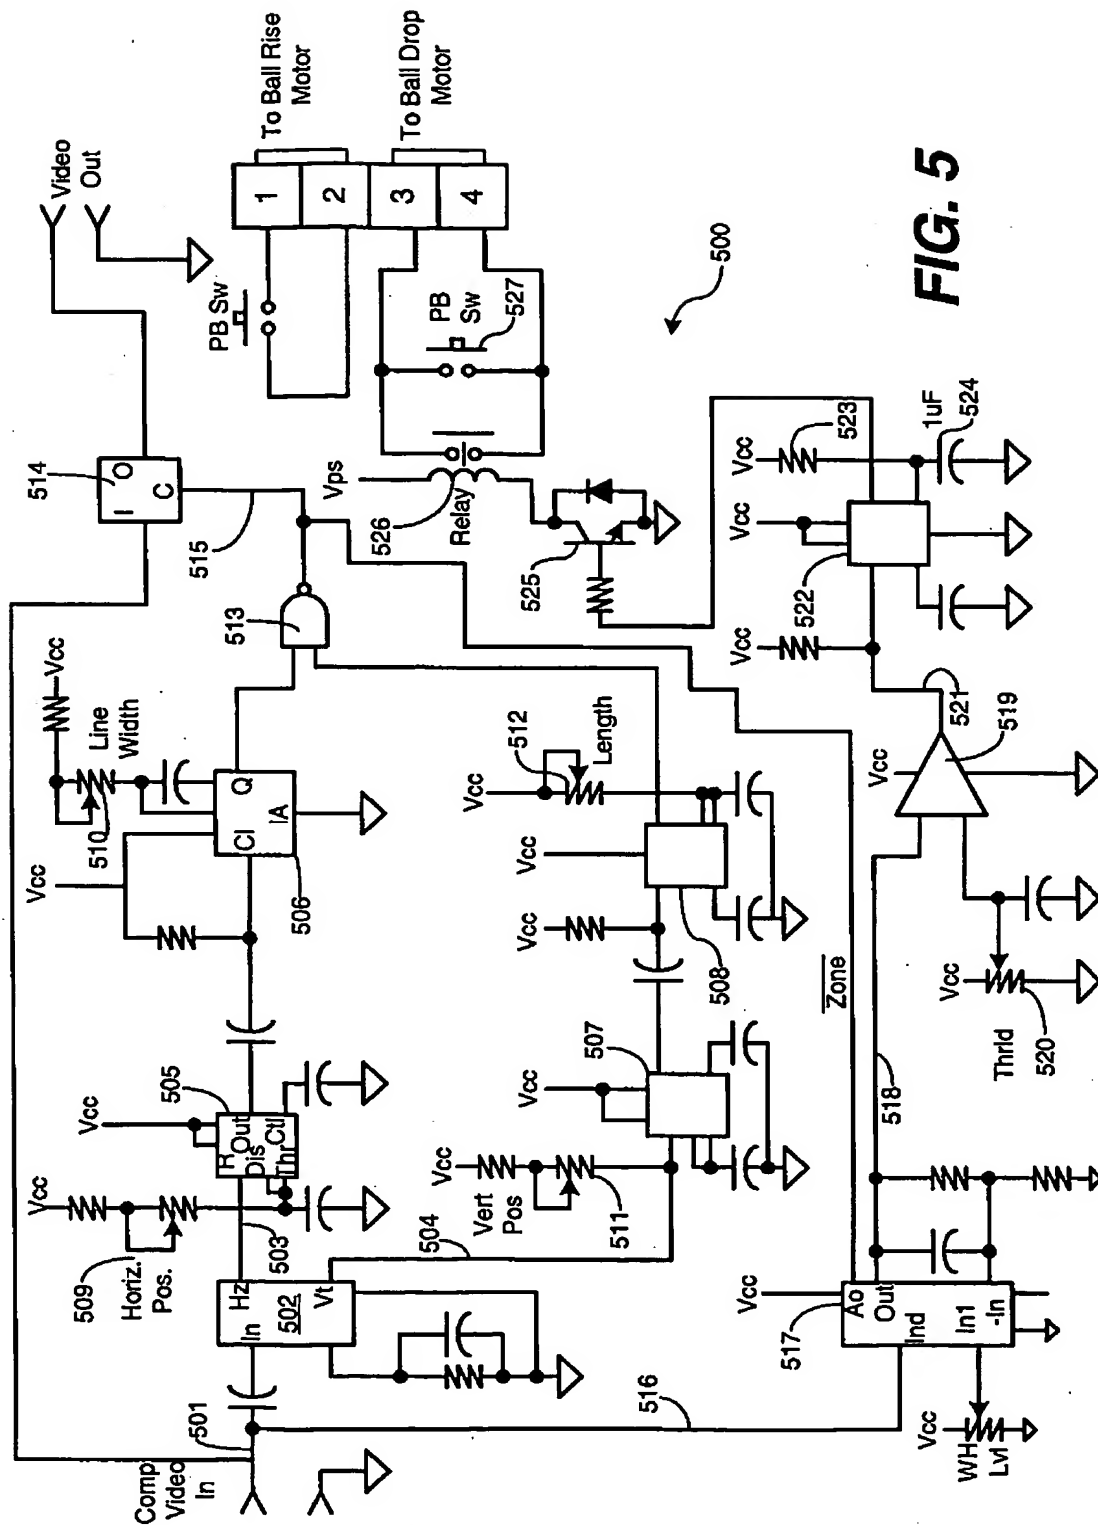

FIG. 5
